DETAILED ACTION

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Drawings

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tseng, et al. (US 6,397,736) in view of Wettlaufer (US 5,207,152). The patent to Tseng, et al. discloses the claimed subject matter except for an inclined feed-in pipe in the manner recited in the claims. The patent to Wettlaufer discloses that it is known in

Art Unit: 1761

the art to have provided an inclined feed-in pipe (e.g. Fig 3) in the manner recited in the claims. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided the processor of Tseng, et al. with an inclined feed-in pipe in the manner suggested by Wettlaufer in order to process food perfectly and smoothly without having a problem of a dead corner of cutting. Regarding claims 3 and 4, the patent to Tseng, et al. discloses the claimed invention except for the shape of the plunger and feed-in pipe being in the shape of a horseshoe or polygon. It would have been an obvious matter of design choice to have the plunger and feed-in pipe of Tseng, et al. being in the shape of a horseshoe or polygon, since applicant has not disclosed that being in any such shape solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well.

Allowable Subject Matter

Claims 2, 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
